DETAILED ACTION

Drawings

The informal drawings are quality to permit examination. Accordingly, new drawings are required once the application is allowed.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims **1-23** are rejected under 35 U.S.C. 102(e) as being unpatentable by Shinagawa et al. (US patent no. 6,323,863).

Re claim 1, Shinagawa discloses a computer system operation method for use with a CAD system in modeling objects, method providing a means for identifying geometric cells of a model, (col. 1, lines 7-25; col. 20, lines 6-26; col. 7, lines 40-67; fig. 1) the method comprising receiving input comprising one or more constraints relating to cell information (figs. 1, 18—element 2, and 30—element 21); for each constraint, determining whether the cell meets the requirement of the constraint (figs 7 and 18—element 3 is the determined unit that determines if the cell meets the requirement of the constraint in programming procedure of figure 7); generating a list of cells meeting the

requirements of the constraints (col. 8, lines 1-22; col. 9, lines 13-46; col. 10, lines 5-13—list of array consisting of a list of cells).

Re claim 2, Shinagawa teaches the computer system operation method wherein the constraints are chosen from a group comprising constraints relating to cell dimension (fig. 1); constraints relating to the topology of a cell (col.20, lines 6-26); constraints relating to the history of the model evolution (col.9, lines 13-46—the array of parent discloses the history of the model evolution); constraints relating to specific attributes of a cell (col. 22, line 51 to col. 23, line 6—parameters correspond to attributes); and constraints relating to geometrical indications of a cell (figs 5-9).

Re claim 3, the limitations of claim 3 are identical to claim 1 above except for the limitations further discussed below. Therefore, claim 3 is treated the same as discussed with respect to claim 1 above. Shinagawa teaches a CAD/CAM apparatus comprising (col. 1, lines 7-25), an input device (fig. 18-element 2); a central processing unit (col. 1, lines 40-55); and a display device (fig. 30—element 43).

Re claims **4, 6, 8, 10, 12, 14, 16-17, 20, and 22**, the limitations of claims 4, 6, 8, 10, 12, 14, 16-17, 20, and 22 are identical to claim 2 above. Therefore, claim 4, 6, 8, 10, 12, 14, 16-17, 20, and 22 are treated the same as discussed with respect to claim 2 above.

Re claims **5, 7, 9, 11, 13, 15, 18-19, 21, and 23**, the limitations of claims 5, 7, 9, 11, 13, 15, 18-19, 21, and 23 are identical to claim 1 above. Therefore, claim 5, 7, 9, 11, 13, 15, 18-19, 21, and 23 are treated the same as discussed with respect to claim 1 above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
